## **DETAILED ACTION**

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 4,5 and 7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claim recite limitation that the edge of the cover is crimped onto the substrate, the specification provides details on the substrate being crushed around the cover as elected by species 2b.
- 3. Claims 4,5 and 7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. To crimp the edges of the cover onto the substrate
- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 09423075

Art Unit: 3729

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 5. Claims 4, 5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to the part that is being crimped. The applicant specification discloses the substrate is crimped over the cover. (page 4 ln. 19-23) and the applicants claim suggest that the cover having edges is being crimped.
- 6. Claims 4,5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims recite a cover that is positioned over the assembly, it is not clear as to wheather the cover is part of the assembly since the applicant invention is directed to a method of producing a assembly.
- 7. Claim 4 recites the limitation "cover", "electronic card", "substrate". There is insufficient antecedent basis for this limitation in the claim.
- 8. Claim 5 recites the limitation "tab or "tabs". There is insufficient antecedent basis for this limitation in the claim.
- 9. Claim 7 recites the limitation "tabs". There is insufficient antecedent basis for this limitation in the claim

Application/Control Number: 09423075

Page 4

Art Unit: 3729

10. Claims 4,5,7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for

failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention. Claim 4 is improperly dependant from canceled claim 1. Appropriate correction is

required

11. No art rejection have been applied to the claims since there are a great deal of confusion

and uncertainty as to the proper interpretation of the limitations of the claims. Therefore, it would

not be proper to reject such claims on the basis of prior art. See MPEP 2173.06
